
**DATA COLLECTION
DESIGN CONCEPT ON
STUDENTS WEEKEND
TIME**

mugumya leonalds—14/U/9560/PS

1 Purpose of data collection

- To find out various activities done by student over the week. To get actual data on various weekend activities students engage in.
- Type of data collected
- Unorganized data of various events and activities that transpired in students life during weekends.

2 Activities found during the data collection

- Go out
- Visit friends
- Go swimming
- Go to church
- Attend events
- Go back home

3 Problems faced

- People were on a move and barely had time for the questionnaire
- Too many questions asked posed a threat to the interviewee
- Incompleteness of forms that led to the cancelling
- People feared to take any form of media because of insecurity.

4 The questionnaire layout

- Introduction of the interviewer to the interviewee
- Details of the interviewer
- Purpose of research explained

5 Student details (interviewee)

- Course Name
- Reg No.
- Gender

6 Take students photo

7 As a muk student which activities do you do over the weekend?

8 Among the above activities which one do you prefer most and why?

9 Any recording of you performing the above activities?

10 Do you also go for prime times at the pool on Saturdays?

11 Does the weekend give you enough time to do all the activities you want?

12 Any comment about this research?
